

What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$9.0 million to more than 340 initiatives [1].

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Missouri

Project Highlight: *Saint Louis Beekeepers Set Up Queen Rearing Program*

Jane Sueme and the Saint Louis Beekeepers (SLB) in Missouri advanced their local queen rearing program through a \$37,675 NCR-SARE Partnership grant, aiming to provide regionally adapted, survivor-stock queens and nucleus colonies to local beekeepers. The project addressed the scarcity of locally bred queens in the Missouri and Illinois areas while promoting sustainable beekeeping practices.

Building on a previous NCR-SARE Farmer Rancher grant, the SLB Partnership project focused on improving queen bee production methods to meet growing demand for locally adapted stock, reduce reliance on imported queens, and increase colony survivability. Over the course of two seasons, SLB raised and distributed over 200 queens and nucs using diverse starter/finisher colony methods, refined grafting techniques, and monitored mating success across multiple apiary sites. Their work also included educational outreach, training beekeepers in queen rearing through hands-on workshops and printed resources.

"Being able to provide both mated queens and nucleus colonies from this survivor population, which successfully overwinters in our zone, increases the purchasing beekeepers' springtime hive strength and honey production, while decreasing the cost of stock replacement," said Sueme.

For more information on this project, see sare.org/projects, and search for project numbers [FNC18-1145](#) and [ONC22-114](#).

SARE in Missouri

[1] These totals reflect available data; complete information may not be available for all grant programs prior to 2016.

SARE in Missouri, 2020–2025

This is a summary of recent SARE-funded activities and impacts in the state. To search all SARE projects visit projects.sare.org. For a list of all projects in Missouri visit projects.sare.org/state-fact-sheets/.

Grants awarded

Total awards: **81 grants**

- 45 Farmer/Rancher
- 6 Research and Education
- 4 Professional Development Program
- 4 On Farm Research/Partnership
- 8 Graduate Student
- 9 Youth Educator
- 4 PDP State Program [2]
- 1 Community Foods Project

Total funding: **\$3,925,803**

- \$711,785 Farmer/Rancher
- \$1,492,327 Research and Education
- \$388,024 Professional Development Program
- \$186,252 On Farm Research/Partnership
- \$139,361 Graduate Student
- \$47,157 Youth Educator
- \$569,989 PDP State Program [2]
- \$390,908 Community Foods Project

[2] The Professional Development Program (PDP) State Program is a non-competitive award that funds the activities of the state coordinator(s). See more below.

Farmer and rancher impacts

SARE grantees have reported the following impacts from their projects:

7,563 farmers participated in a SARE-funded project

912 farmers reported a change in knowledge, awareness, skills or attitude

357 farmers changed a practice
